ABOUT

These pumps deliver the high performance needed for filter systems and spectacular waterfalls. With vortex Impeller design (on 10000, 18000 and 28000) and prefilter cage, these pumps will comfortably handle soft solids for filtration. They also feature wear-resistant ceramic bearings, asynchronous motors and thermal overload protection. Inline/dry-mounting is possible, with flooded suction. Cage is very easy to remove for maintenance. Fully submersible, IP68 rating. Guarantee is on the motor only.

APPLICATIONS

- Water Features
- Ponds
- Fountains
- Statues
- Waterfalls
- Filtration

IMPORTANT: Not suitable for salt water

FEATURES

- Fully Submersible, Patented Design
- Quiet, Continuous Operation, Low Power Consumption
- Thermal Overload Protection
- Soft Solids Handling
- Ceramic Bearings
- Dry-Mount With Flooded Suction
- Foam Pre-Filter
- Adjustable Base-Plate Can Be Rotated
